labelfive

labelfive

label printing software

The ultimate solution for all your label design and printing needs, including RFID challenges

one window... endless labels

7 24353 783

Applications:

Warehouse stock management
Retail products
Product illustrations
Pharmaceutical equipment
Telecommunications equipment
Postal services
Air Cargo
Packing and Shipping
Blood Banks
Libray books
Etc

Total environment integration

Label design and database operations are presented in a fully integrated environment providing results for each operation in real time with higher optimization and no need for preview operations.

Database connections and features

Create your internal database or connect to any database type trough ODBC and get total database access without import or export operations. Use all the database functionalities available for a maximum connectivity and data control management.

Direct printing for maximum speed and error control

Print using Windows drivers or using the DCL (Direct Command Language) drivers integrated on LabelFive to get faster printing sessions and enhanced control over errors. LabelFive's DCL are available for more than 80 of the most popular label printers on the market.

Higher level resources

Use one of the 20 barcode types provided or PDF-417. Optimize your database resources using all database tools and encode your labels with RFID technology,.
Encode RFID to TI Tag, Phillips I-Code, IT Pico Tag, Phillips ISO 15693, TI ISO 15693
Major barcodes styles, rotate, align, check digits, human readable and transparent background.

Reasons to choose LabelFive

Robustness

You will be working with an application with a very robust structure benefiting from nFive's more than 11 years of R&D.

Simplicity

nFive works hard to find the easiest and most productive way of doing things and this results in applications very simple to learn and operate that often move the market in new directions.

Reliability

nFive is world leader on the ID market and has a dedicated and professional team that supports it's products with frequent updates providing assistance, consultancy and compatibility with other products and technologies.

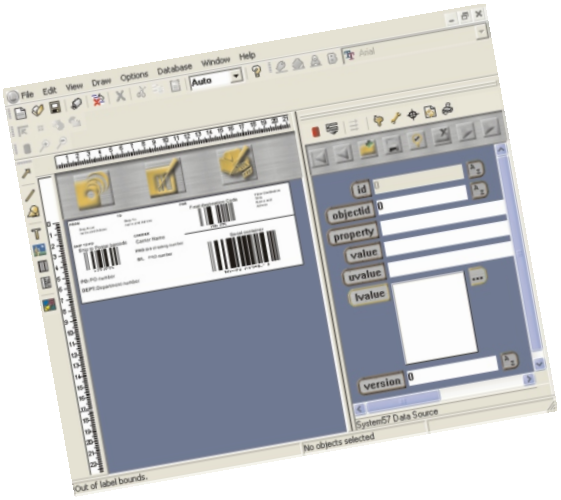
LabelFive Interface



LabelFive Standard Features

Barcodes and Objects

Barcodes & PDF 417 2D - Major barcodes styles, rotate, align, check digits, human readable and transparent background. Encode photos in PDF 417 two-dimensional barcodes
Variable Sources - Use variables with text, image, barcode and PDF - symbol object, system resource variables like date and time, global counter and print time, ODBC and SQL data sources, recursive concatenation of all variables
Object Protection - Activate protection and turn objects previously marked not selectable

Database

External Database - ODBC database connection for maximum connectivity and no import or export operations (Access, Paradox, FoxPro, Excel, SQL, Oracle, AS/400, etc...)
Internal Database - Create your own database without the need of external applications
Database query - Filter records of database, save applied queries with the label layout, find a record in seconds
Database view - Change the columns sequence on the display, hide confidential data field, change column order
Find Functions - Locate specific records quickly
Browse - browse and record views

Printing

DCL's & Windows Driver Printing - Direct Command Language to major printers on the market. Get maximum speed and error control or print to any printer by Windows Driver
Autoprint - Automatically print labels by adding records

Tools & Imaging

Text - Use of all windows fonts, text rotations alignments and auto stretch.
Shapes - Lines, rectangles, and ellipse, filled or unfilled
Clipart browser - Visual file system for an easier and more intuitive image file management
Import Image from File - BMP, TIF, TGA, PCX, JPG, WMF or from Clipart gallery picture
Twain image acquisition interface - Scanner, digital camera or any Twain device to acquire photos
Direct show/video for windows image acquisition - Direct show supported. Real time video
Build-in Image Tools - Adjust and control image properties
Compressed photo image - Compression to reduce database size
OLE Objects & Photo on a Database Record - Add photos to database records
Windows & Private Clipboard - Open or paste items from LabelFive or Windows Clipboard

Other features

WYSIWYG Multi Document Interface - No need to preview operation
KeyFive Protection (SmartCard) - with serial or USB interface (default)
Free Updates - Available FREE of charge at www.nfive.com
Setup Programs on CD, with Multi-language installation version in English, French, Portuguese, Italian and Spanish
Manual available in digital format and printed in one selected language

LabelFive Editions

Upgrades available by email *(using RLL technology)*

Other features	Standard	Elite
RFID Encoding - Encode RFID to TI Tag, Philips I-Code, IT Pico Tag, Philips ISO 15 693, TI ISO 15693		■

Optional plug-in

Face Snap
For professional photo badge production.
Automatically identifies faces within a scenario, cropping them with 10% of surrounding area, and optimizing all images for total consistency of the production work.
