

TIMEfive

TIMEfive

time attendance software

Manage and track employees work time with an easy to use graphic interface

know the meaning of time

TimeFive gives you real time employee summary and allows you to manage your team with complete employee record (including Photo Capture); it has a fixed and flexible timetable processing and is prepared to manage all kind of company structure such as Multi Company, Multi Department with or without Multi Terminal (Fingerprint and SmartCard).

With TimeFive you can create conditions to increase control, punctuality, productivity, reliability and reduce costs.

Applications:

Offices
Shops
Construction sites
Ships
Factories
Institutions
Restaurants
and much more

Specific Needs:

Fixed / Flexible timetables
Remote management
Payroll integrators
Contractors
Temporary workers

Economy

TimeFive is a robust and multi functional application that can combine all the administration tasks related to management of employees work time and company activity thus saving time, money and human resources.

Efficiency

TimeFive has a user friendly interface with an attractive and organized structure that provides an easy introduction and a fast learning curve.

Versatility

TimeFive allows the view and update of exceptions, absences and deviations with filter information capabilities. It can also create and manage Multi Country, Multi Company, Multi Department, Multi Site and Multi Shifts, as well as plan Holidays and employees' vacations.

Perfect integration

TimeFive was created with an eye on the future. Multi Company management and Multi Department supervision with all the relevant employees' information are the most important goals in most businesses structures. TimeFive can be integrated with AccessFive (access control) and Terminal Seven Technologies (automation), it can also be integrated with Multiple Data Collectors by TCP/IP or MBUS, using remote management system.

- Small learning curve
- Works with Data Collectors
- Easy maintenance
- Define shifts
- Leave messages on Check In event

Robustness

You will be working with an application with a very robust structure benefiting from NFive's more than 11 years of R&D.

Simplicity

NFive works hard to find the easiest and most productive way of doing things and this results in applications very simple to learn and operate that often move the market in new directions.

Reliability

TimeFive's frequent updates and new releases accompanying new trends and technology developments guarantee that your software will never be out dated.
