

Datacard® Finger Pointe™ Solution

The Finger Pointe solution can enable biometric enrollment and verification, as well as capture and storage of Automated Fingerprint Identification System (AFIS) quality fingerprint images.

High-quality fingerprint capture and verification

Enhance card security and help deter identity theft with the Datacard® Finger Pointe™ solution. It integrates Finger Pointe™ software, part of the Datacard® Capture Pointe™ Series software family, and a fingerprint reader.

When used with Datacard® IDCentre™ Gold identification software, the solution enables you to scan a fingerprint and store a digital template in a biometric database for biometric identity verification. When used with Datacard® IDCentre™ Lite, Bronze, Silver or Gold identification software, the Finger Pointe solution can capture a photographic image of a fingerprint and print it on a secure photo ID card. Adding this image to a card can help reduce the risk of identity theft. The image is AFIS quality and is captured at 500 ppi for higher accuracy when verifying a fingerprint image.

Simple, easy-to-use solution

- Install the Finger Pointe software, connect the reader and you are ready to scan fingerprints.
- Use the solution to add sophisticated biometric verification or convenient fingerprint capture and storage to your ID card program.

Datacard® Finger Pointe™ Solution

Features

Capture, print and store fingerprint images
AFIS quality images
Enroll and verify biometric fingerprint templates (with IDCentre Gold identification software)
One-to-one verification (with IDCentre Gold identification software)

Components

Datacard® Finger Pointe™ software
Identix® BioTouch® 500 USB Fingerprint Reader
USB license key
Installation instructions
User documentation

Specifications

Dimensions: W 2.4 in. x L 3.8 in. x H 1.2 in.
(60 mm x 96 mm x 31 mm)
Weighs 5.3 oz. (150.0 g)
Image capture surface of 0.79 in. x 0.98 in. (20 x 25 mm)
USB2 interface
Powered through USB port
Operates in temperatures from 10° to 40° F (50° to 104° C)
Agency approvals: FCC, CE, RoHS Compliant

System requirements

For fingerprint image capture: IDCentre Gold, Silver, Bronze or Lite identification software
For enrollment and verification: IDCentre Gold identification software
For fingerprint solution: Two free USB ports
